Index to Volume 11

ARTICLES

Appel, Valentine. **On Advertising Wear Out.**

No. 1, pp. 11-13.

Low scoring TV commercials quickly grew worse with repeat exposures, while some high scorers actually increased their effectiveness.

Assael, Henry. **Perceptual Mapping to Reposition Brands.**

No. 1, pp. 39-42.

Taste, social benefits, product quality, and convenience emerged as the factors by which Nestle used mapping to reposition brands.

Case, Peter B. **How to Catch Interviewer Errors.**

No. 2, pp. 39-43.

One out of four survey interviews may contain serious errors. In this review of ARF's FACT service, a staff member suggests how to correct this problem.

Clancy, Kevin J. and David M. Kweskin. **TV Commercial Recall Correlates.**

No. 2, pp. 18-20.

Attitudes toward a program may influence a consumer's recall of spots.

Day, George. **Attitude Change, Media, and Word of Mouth.**

No. 6, pp. 31-40.

Advertising was found to create the preconditions for initial new product success but word of mouth and satisfactory usage were causes of ultimate success.

Ehrenberg, Andrew. **Predicting Behavior of New Brands.**

No. 6, pp. 3-10.

New Brand's success can be predicted if one understands buyer behavior in the existing market.

Fenton, James S. and Thomas R. Leggett. **A New Way to Find Opinion Leaders.**

No. 2, pp. 21-25.

Self-designated opinion leaders had more income, education, memberships, and motivation to achieve.

Friedman, Lawrence. **Calculating TV Reach and Frequency.**

No. 4, pp. 21-25.

Campaign effectiveness, wear-out, pulsing, and copy tests can all be better understood by reach and frequency calculations.

Geiger, Joan A. **Seven Brands in Seven Days.**

No. 5, pp. 15-22.

When does frequency of advertising become too low to be effective? Too high to be effective? To find out, Ted Bates Agency tracked seven brands for a week.

Goett, John J. See Tolley and Goett.

Grass, Robert C., Lewis C. Winters, and Wallace H. Wallace. **A Behavioral Pretest of Print Advertising.**

No. 5, p. 11-14.

Separate objective measures of attention and learning found one carpet ad most effective.

Greene, Jerome D. and J. Stevens Stock. **A Rate-Frequency Model of Behavior.**

No. 4, pp. 9-19.

Haley, Russell I. **Beyond Benefit Segmentation.**

No. 4, pp. 3-8.

Not just improved media buying but also increased communication with the target market is the reason for going beyond benefit segmentation.

Jacoby, Jacob. **A Model of Multi-Brand Loyalty.**

No. 3, pp. 25-31.

Consumers may be loyal to several brands; when, why and how are suggested in the multi-brand loyalty model.

Kaplan, Robert S. and Allan D. Shocher. **Discount Effects on Media Plans.**

No. 3, pp. 37-43.

Purely mathematical programming, with a budget constraint, will not find the optimal media schedule because of discounts on media plans.

Kennedy, John R. **How Program Environment Affects TV Commercials.**

No. 1, pp. 33-38.

XUM

It depends on the product, the program, and how well they go together.

King, Charles W. and John O. Summers. **Attitudes and Media Exposure.**

No. 1, pp. 26-32.

Attitudes toward risk, leadership and change–basically unrelated to education or other demographics–can improve the matching of media schedules to market segments.

Kline, John M. See Overholser and Kline.

Koch, James V. **Advertising and Economic Growth.**

No. 4, pp. 36-39.

Neither product differentiation nor possible advertising-induced barriers to entry were found to encourage or discourage an industry's growth.

Krugman, Herbert E. **Brain Wave Measures of Media Involvement.**

No. 1, pp. 3-9.

We act on print, but TV acts on us, according to this recent G.E. Study.

Kweskin, David M. See Clancy and Kweskin.

Leavitt, Clark. See Wells, Leavitt, and McConville.

Leggett, Thomas R. See Fenton and Leggett.

Marschner, Donald C. **DAGMAR Revisited–Eight Years Later.**

No. 2, pp. 27-33.

Of nine oil companies, those who paid heed to DAGMAR have been more successful.

Mayer, Charles S. **Quality Control in Research.**

No. 3, pp. 9-14.

Here are ten steps anyone can take to reduce errors in marketing information.

McConville, Maureen. See Wells, Leavitt, and McConville.

Murphy, Joseph R. **Responses to Parts of TV Commercials.**

No. 2, pp. 34-38.

Attention, comprehension, and other attitudes were correlated with second-by-second viewing to measure responses.

Overholser, Charles E. and John M. Kline. **Advertising Strategy from Consumer Research.**

No. 5, pp. 3-9.

Here is an overview from Y&R's research director, recently presented to the FTC about how they use research to develop advertising strategies.

Pearson, Arthur S. **How to Compare New Product Programs.**

No. 3, pp. 3-8.

Four measures of their relative financial measures showed Bristol-Myers how to compare new product programs.

Pierce, Francis. **How Foreign Students See U.S. Advertising.**

No. 6, pp. 26-29.

The lower the stage of economic development of students' home countries, the more favorable was their overall attitude toward advertising.

Preston, Ivan L. and Steven E. Scharbach. **Advertising: More Than Meets the Eye?**

No. 3, pp. 19-24.

Contrary to common belief, people may perceive more in ads than is actually there.

Ray, Michael L., Alan G. Sawyer, and Edward C. Strong. **Frequency Effects Revisited.**

No. 1, pp. 14-20.

Copy theme, color, shopping habits, knowledge of the brand, competitive advertising–all can shape the rate at which advertising is forgotten.

Sawyer, Alan G. See Ray, Sawyer, and Strong.

Scharbach, Steven E. See Preston and Scharbach.

Schiffman, Leon G. **Sources of Information for the Elderly.**

No. 5, pp. 33-37.

To learn about a salt substitute, older consumers relied more on experience and less on external, informal messages.

Schwartz, David. **Evaluating Packaging.**

No. 5, pp. 29-32.

Containers "advertise" by attracting attention, reinforcing attitudes, giving information. Schwartz gives three ways of evaluating packaging.

Sexton, Donald E. **Overspending on Advertising: The Prisoner's Dilemma.**

No. 6, pp. 19-25.

There is a way to evaluate advertising from a social welfare viewpoint. This article also delineates necessary and sufficient conditions for determining if ad expenditures for a product constitute a misallocation of resources for the firm and for society.

Sheth, Jagdish N. **Word-of-Mouth in Low-Risk Innovations.**

No. 3, pp. 15-18.

Word-of-mouth was important to both awareness and purchase of stainless steel razor blades.

Shocher, Allan D. See Kaplan and Shocher.

Sissors, Jack Z. **Matching Media with Markets.**

No. 5, pp. 39-43.

An index found by profile analysis was used to identify the best media vehicles.

Staelin, Richard D. **Another Look at A.I.D.**

No. 5, pp. 23-28.

The Automatic Interaction Detector offers a flexibility not available in other multivariate techniques.

Stapel, Jan. N. **Sales Effects of Print Ads.**

No. 3, pp. 32-36.

Exposure to just a single ad produced higher intent-to-purchase.

Stock, J. Stevens. See Greene and Stock.

Strong, Edward C. See Ray, Sawyer, and Strong.

Summers, John O. See King and Summers.

Tigert, Douglas J. See Wells and Tigert.

Tolley, B. Stuart and John J. Goett. **Reactions to Blacks in Newspaper Ads.**

No. 2, pp. 11-17.

Use of black models was advantageous to the retail newspaper retailer.

Wallace, Wallace H. See Grass, Winters, and Wallace.

Wells, William D., Clark Leavitt and Maureen McConville. **A Reaction Profile for TV Commercials.**

No. 6, pp. 11-17.

Analyzing consumers' reactions to ads gives interesting and useful information about the effectiveness of a campaign.

Wells, William D. and Douglas J. Tigert. **Activities, Interests and Opinions.**

No. 4, pp. 27-35.

Studies of eye make-up and shortening show how psychographics help describe target audience and product users.

Wheatley, John J. **Assessing TV Pretest Audiences.**

No. 1, pp. 21-25.

Testers of TV commercials can safely forego the expensive search for product users.

Winters, Lewis C. See Grass, Winters, and Wallace.

Ziff, Ruth. **Psychographic Market Segmentation.**

No. 2, pp. 3-9.

Attitudes, values, and needs differentiate brands as well as product classes.
